

Message from CMD – Keel Laying of Yard 3025

Keel Laying of the first Survey Vessel (Large) is a major milestone that our shipyard has achieved today. That this milestone has been achieved ahead of schedule despite unforeseen impediments is solely due to the dedicated and untiring efforts put in by the team GRSE, and the same is certainly a momentous occasion for GRSE considering that the CWP&A has graced the occasion and appreciated our efforts.

Bigger challenges await us as we have to accomplish the ultimate goal of completing next milestones such as Launching and delivery of the ship within the contractual timeline. We should therefore, continue to strive hard to achieve the targets set, find innovative solutions to overcome impediments and continually improve our performance benchmarks.

I am fully confident that the shipyard that completed first Century in shipbuilding, would start the next century of excellence with the similar dedication, devotion and enthusiasm and reach the target sooner than expected.

My heartiest congratulations to TEAM GRSE on this accomplishment.

Well done, Shabash

Jai hind.
