

MESSAGE FROM CMD- DELIVERY OF 100TH WARSHIP

Team GRSE has created history by delivering the 100th Warship, IN LCU L-56 to the Indian Navy on 30 Mar 19. This is certainly a landmark achievement of our shipyard which places GRSE at a very unique pedestal in the annals of Indigenous Warship building in the country.

The journey from 1961 when we delivered the 1st indigenously built warship INS Ajay to the Indian Navy to delivery of 100th warship IN LCU L-56 has been a saga of continuous enhancements in our core competence and augmentation of infrastructure to match the world class standards. GRSE has come a long way in developing *in-house design* capability, enhancing indigenous content in recently built platforms, improving skill sets, quality and ability to handle multiple warships constructions. We have reached the century mark in warship production that no other shipyard has achieved in this country till date.

I am most pleased to note the exceptional efforts put in by all personnel of GRSE to deliver Yard 2097 with **NIL shipbuilder's liabilities and post successful completion of Gun Trials**. This has further embellished the delivery of the 100th Warship.

I would like to place on record my deep appreciation and thank all employees both retired and serving for their professionalism, dedication to duty, sincerity of efforts and efficient handling of multitude of challenges which contributed immensely in the phenomenal growth story of GRSE culminating with delivery of 100th Warship to Indian Navy

Further, I would urge upon all personnel of Team GRSE to put in wholehearted efforts to ensure that the ongoing projects including the most prestigious mega projects i.e. P17A are progressed with greater efficiencies and productivity in all areas of operations to achieve timely deliveries of various ships to Indian Navy and Indian Coast Guard.

*My heartiest congratulations to **TEAM GRSE** once again on this Historic milestone.*

Well Done, Shabash

Jai Hind!
