

MESSAGE FROM CMD
SIMULTANEOUS LAUNCHING OF YARD-2115 & 2116

This is yet another momentous occasion for GRSE when we have simultaneously launched third & fourth ships of the series of five FPV from Building Berth of the Main Unit of our shipyard on 22 Nov 18. This milestone has been made possible by dedicated and untiring efforts put in by team members of Main Works with coordinated efforts put in by members from Planning, Material, Design, QA and other support Departments.

The Keel for these ships was laid on 30 Oct 17 and I am happy to note that these ships have been brought to the present state of readiness through the unwavering effort by Team GRSE.

Having achieved this important milestone, the next target is to achieve the delivery of Yard 2113 by Feb 19. In order to meet this target, I expect the Team RBD to put in whole hearted efforts with full zeal, dedication, sincerity and synergy.

I am very confident that GRSE personnel are very capable and will meet the targets with vigour and josh in coming years.

I once again convey my congratulations to all personnel of GRSE on this magnificent accomplishment.

Well done, Shabash.

Jai Hind.

22 Nov 18

Chairman & Managing Director
